Professional Summary

Python Backend Engineer and Algorithmic Trading Systems Developer with around 3 years of experience across backend APIs, data engineering, automation, and trading technology. Built **AlgoAgentX**, an end-to-end algo trading SaaS platform covering strategy backtesting, market data management, broker connectivity, live trading workflow, risk management, reporting, billing, and admin operations. Strong hands-on experience with **Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, AWS, Pandas, PySpark, broker APIs, WebSockets, React/Next.js, and production debugging**. Interested in fintech, broker platforms, trading infrastructure, market data systems, and algo trading products.

Featured Project

Featured Project — AlgoAgentX: Algo Trading SaaS Platform

Type: Independent Trading Systems Project / Proof-of-Work Product

Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, Next.js, React, Tailwind CSS, Broker APIs, MT5 Agent, Upstox, Razorpay

Links: ▶ AlgoAgentX Demo | Case Study PDF

- Built an end-to-end algo trading SaaS platform for strategy backtesting, live trading workflow, broker connectivity, market data management, reporting, billing, and admin operations.
- Designed Python/FastAPI backend with PostgreSQL, async SQLAlchemy, authentication, user/admin role flows, API validations, and Docker-based deployment.
- Developed backtesting workflow with runtime settings, risk-based position sizing, SL/TP rules, win rate, drawdown, profit factor, equity curve, and trade-level reports.
- Implemented broker integration architecture including Upstox-style broker connectivity and MT5 Windows Agent workflow for live trading execution.
- Built admin console for market data import, market master, instruments, strategies, live trading approvals, users, subscriptions, coupons, credits, orders, payments, settings, and support.
- Added SaaS monetization modules including credit-based backtest usage, Razorpay payment flow, subscription plans, coupon engine, and billing admin tools.
- Solved production-level issues including database migrations, timeout hardening, market data coverage validation, timezone handling, duplicate order prevention, and broker execution debugging.

Core FinTech / Trading Skills

- Algorithmic trading systems
- Strategy backtesting and optimization
- Broker API integration
- Live trading execution workflow
- Market data ingestion and validation
- Risk management and position sizing
- SL/TP, trailing SL, risk-reward logic
- Trading performance metrics: PnL, drawdown, win rate, profit factor
- Trading reports, equity curve, trade history, audit logs
- SaaS billing, credits, subscriptions, coupons, admin workflows

Technical Skills

Domain	Technical Skill
Backend	Python, FastAPI, Flask, REST APIs, SQLAlchemy, Pydantic
Data	Pandas, NumPy, PySpark, AWS Glue, ETL pipelines, data validation
Data & Databases	PostgreSQL, MySQL, SQL, DynamoDB, Redshift
Cloud & DevOps	AWS Lambda, S3, SQS, Step Functions, CloudWatch, Docker, Git, GitHub
Frontend	React.js, Next.js, TypeScript/JavaScript, Tailwind CSS
Testing & Tools	Pytest, logging, monitoring, DBeaver, Postman, VS Code

Professional Experience

Freelance — Contract for HCLTech / MOTOR
Data Engineer | Feb 2025 – Present

- Built and maintained Python/AWS-based data automation workflows using Lambda, Glue, Step Functions, S3, SQS, and API integrations.
- Developed finance data pipelines for invoice, remittance, credit memo, and document-processing workflows.
- Processed large-scale data workloads using PySpark/Glue with schema mapping, validation, incremental processing, and monitoring.
- Integrated external APIs and automated PDF/CSV generation workflows to reduce manual finance operations.
- Implemented logging, alerting, retry handling, and production support using CloudWatch and notification workflows.

33 Kuber India Advisory LLP
Software Developer | Sep 2023 – Jan 2025

- Built full-stack business applications using Python, Flask/FastAPI, React, Tailwind CSS, MySQL, and REST APIs.
- Developed authentication, OTP login, password reset, CRM/task/project/timesheet modules, and admin workflows.
- Optimized MySQL databases using stored procedures, views, indexing, and query improvements.
- Integrated frontend dashboards with backend APIs and improved stability through testing, debugging, and production fixes.

Education

B.Sc. IT — University of Mumbai
Sree Narayana Guru College of Commerce | Graduated 2023 | 9.13 CGPA

Class XII — Board of Intermediate Education
R.R.M.Y Inter College High School +2 | 2020 | 73.2%

Class X — Board of Secondary Education
S.R.P.N. High School | 2018 | 63%
