MD IRSAD

Data Engineer | AWS Data Engineer | Python & PySpark Engineer

+91-8409718735 | mdirsadtech7305@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Engineer and Python Developer with 3+ years of experience building ETL/ELT pipelines, distributed data processing workflows, AWS serverless solutions, backend APIs, and finance-data automation. Hands-on experience with **Python, SQL, PySpark, AWS Glue, S3, Lambda, Step Functions, SQS, DynamoDB, Redshift, CloudWatch, Pandas, MySQL, REST APIs, Git, Docker, and CI/CD**. Experienced in large-scale ingestion, schema mapping, incremental processing, data validation, transformation, data warehousing with Redshift, API-based integration, workflow orchestration, monitoring, and production issue resolution. Strong fit for Data Engineer and AWS Data Engineer roles requiring scalable data pipelines, Python/SQL, Spark-based ETL, cloud services, data quality, and reliable operations.

Core Expertise: Data Engineering | Python | SQL | PySpark / Apache Spark | ETL/ELT | AWS Glue | S3 | Lambda | Step Functions | Redshift | Data Warehousing | Data Pipelines | Data Validation | Incremental Processing | MySQL | Git | CI/CD

TECHNICAL SKILLS

Programming & Backend: Python 3.12/3.13 | SQL | FastAPI | Flask | REST APIs | SQLAlchemy | Pydantic | Boto3

Data Engineering & Analytics: PySpark / Apache Spark | Pandas | NumPy | AWS Glue | ETL/ELT Pipelines | Data Transformation | Schema Mapping | Incremental Processing | Data Validation | Data Pre-processing | Data Warehousing

AWS & Cloud: S3 | Lambda | Glue | Step Functions | DynamoDB | Redshift | Athena | CloudWatch | SQS/SNS | IAM | API Gateway | ECR | ECS | Cognito

Databases & DevOps: MySQL | DynamoDB | Redshift | Docker | Git | GitHub | CI/CD | Poetry | Conda | Pytest | Unittest | Testcontainers | SonarQube

Data Integration & Automation: Oracle ORDS | REST APIs | API Integration | Workflow Orchestration | Finance Data Processing | PDF/CSV Automation | Monitoring & Error Handling

Frontend & Tools: React.js | Next.js | Node.js | Express.js | Tailwind CSS | JavaScript/ES6+ | Jupyter Notebook | Postman | DBeaver | VS Code | PyCharm

PROFESSIONAL EXPERIENCE

Data Engineer | Freelance – Client: HCLTech / MOTOR

Feb 2025 – Present

Finance Data Engineering & AWS Cloud Pipelines

Build and support Python, PySpark, and AWS-based data workflows for finance processing, distributed ETL, serverless orchestration, API integrations, data validation, monitoring, and production issue handling.

Key Contributions:

- Developed AWS Glue/PySpark ETL pipelines for invoice, remittance, and credit-memo datasets, including transformation, schema mapping, validation, and enrichment.
- Orchestrated multi-step data workflows using Step Functions, Lambda, S3, SQS, DynamoDB, and Redshift for reliable ingestion and downstream processing.
- Implemented incremental processing, Glue bookmarks, large-scale data ingestion, data-quality checks, and Redshift-oriented warehouse workflows.
- Integrated Oracle ORDS/REST APIs and added CloudWatch monitoring, alerts, error handling, and operational troubleshooting for automated data and document flows.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | SQS | Step Functions | DynamoDB | Redshift | CloudWatch | Pandas | Oracle ORDS | REST APIs

Software Developer | 33 Kuber India Advisory LLP

Sep 2023 – Jan 2025

Python Backend, SQL & Business Data Applications

Developed Python backend services and business applications with REST APIs, MySQL, authentication, reporting, integrated workflow modules, and database optimization.

Key Contributions:

- Built and maintained Python REST APIs using Flask/FastAPI and MySQL for business applications and data-driven workflows.
- Developed CRM/CRS/SRC integrations and modules for task, attendance, timesheet, project, leave, authentication, and reporting workflows.
- Optimized MySQL using stored procedures, views, functions, indexing, query improvements, and reusable SQL logic.
- Supported API integration, application testing, Git-based development, troubleshooting, and production issue resolution.

Tech Stack: Python | Flask | FastAPI | MySQL | SQL | REST APIs | React.js | Tailwind CSS | Git | Pytest

PROJECTS

PROD FINANCE DATA PIPELINE – AWS Data Engineering

Client: MOTOR | **Period:** Feb 2025 – May 2025 | **Role:** Data Engineer

Designed and deployed an AWS data pipeline for invoice, remittance, and credit-memo processing using distributed ETL, data-lake storage, orchestration, validation, and warehouse integration.

- Developed AWS Glue/PySpark ETL processing for approximately 30GB+ of daily data.
- Implemented schema mapping, incremental loads, Glue bookmarks, transformation, enrichment, and data-quality workflows.
- Orchestrated processing with Step Functions and Lambda, using S3 as the data-lake layer and Redshift for analytical storage workflows.
- Added CloudWatch monitoring, SES alerts, Teams notifications, and error handling; reduced downtime by 40%.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | Step Functions | DynamoDB | Redshift | CloudWatch

PRINTSOFT REPLACEMENT – Serverless Finance Data & Document Automation

Client: AUS Logistics | **Period:** May 2025 – Present | **Role:** Data Engineer

Migrated a legacy Printsoft workflow to a serverless AWS architecture for finance-data integration, automated document generation, storage, and reprocessing.

- Built Lambda/SQS/S3 workflows for invoices, bills, statements, and credit memos.
- Integrated Oracle ORDS APIs and DynamoDB enrichment for automated data and document processing.
- Implemented conditional PDF/CSV templates, naming conventions, reprint logic, validation, and output storage.
- Reduced manual document-processing effort by 80% through workflow automation and audit-friendly storage.

Tech Stack: Python | AWS Lambda | SQS | S3 | DynamoDB | Oracle ORDS | REST APIs | PDF/CSV Automation

JAZZTRACK MANAGEMENT SYSTEM – Business Application Platform

Company: 33 Kuber India Advisory LLP | **Period:** Sep 2023 – Jan 2025 | **Role:** Software Developer

Built Python APIs and SQL-backed business applications with integrated operational data, workflow modules, authentication, reporting, and database optimization.

- Developed Flask/REST APIs and React/Tailwind modules for business workflows and reporting.
- Integrated CRM, CRS, and SRC systems to support centralized customer and operational data.
- Optimized MySQL using stored procedures, views, functions, indexing, and query improvements.
- Built OTP authentication, task tracking, attendance, project, timesheet, and leave-management workflows.

Tech Stack: Python | Flask | MySQL | SQL | REST APIs | React.js | Tailwind CSS | Git

DATA ENGINEERING ALIGNMENT

Production Data Focus: Hands-on experience with Python/SQL, PySpark-based distributed ETL, AWS Glue, S3 data-lake workflows, Step Functions orchestration, Redshift, MySQL, incremental processing, schema mapping, data validation, monitoring, alerting, and API-driven ingestion. Current gaps for the referenced postings include direct production experience with **Databricks, Delta Lake, Apache Airflow, Snowflake, DBT, BMC Control-M, Azure Data Factory, and Azure Blob Storage**; these are not claimed as professional experience.

EDUCATION

B.Sc. Information Technology — University of Mumbai | Sree Narayana Guru College of Commerce | Graduated 2023 | 9.13 CGPA

Class XII — R.R.M.Y Inter College High School+2 | Board of Intermediate Education | 2020 | 73.2%

Class X — S.R.P.N. High School | Board of Secondary Education | 2018 | 63%

TARGET ROLES

Target Roles: Data Engineer | AWS Data Engineer | Python Data Engineer | Cloud Data Engineer | ETL Developer | Data Platform Engineer
