MD IRSAD

Python Developer | Backend Engineer | AI Automation Engineer

+91-8409718735 | mdirsadtech7305@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Python Developer and Data Engineer with 3+ years of experience building backend APIs, SQL-driven business applications, cloud automation, enterprise integrations, and finance-data workflows. Hands-on experience with **Python, FastAPI, Flask, REST APIs, SQL, MySQL, SQLAlchemy, AWS, Git, Docker, CI/CD, Pytest, React, and production troubleshooting**. Experienced in database optimization, API integration, authentication workflows, serverless architectures, and workflow automation. Also experienced with **LLM APIs, prompt engineering/automation, RAG concepts, and AI-assisted Python workflows**, with strongest alignment to backend and applied GenAI integration rather than research-heavy ML roles.

Core Expertise: Python | Backend Development | REST APIs | SQL Development | Query Optimization | Application Architecture | Enterprise Integrations | Git | CI/CD | AWS | AI/LLM Automation | Prompt Engineering | Production Support

TECHNICAL SKILLS

Programming & Backend: Python 3.12/3.13 | FastAPI | Flask | REST APIs | SQLAlchemy | Pydantic | Boto3 | OOP | API Integration

SQL & Databases: SQL | MySQL | DynamoDB | Redshift | Database Design | Stored Procedures | Views | Functions | Indexing | Query Optimization

Cloud & DevOps: AWS Lambda | S3 | Glue | Step Functions | SQS/SNS | CloudWatch | IAM | API Gateway | ECR | ECS | Git | GitHub | Docker | CI/CD | Pytest | Unittest | SonarQube

AI & Automation: LLM APIs | Prompt Engineering / Automation | RAG Concepts | AI-assisted Workflows | Python Automation | Data Preparation for ML | Workflow Automation

Frontend & Tools: React.js | Next.js | JavaScript/ES6+ | Node.js | Express.js | Tailwind CSS | Axios | Postman | DBeaver | VS Code | PyCharm

PROFESSIONAL EXPERIENCE

Data Engineer | Freelance - Client: HCLTech / MOTOR

Feb 2025 - Present

Python, AWS & Enterprise Data Integration

Build Python and AWS-based data workflows, API integrations, serverless processing, document automation, monitoring, and production issue handling across finance-data projects.

Key Contributions:

- Developed Python and AWS Glue/PySpark workflows for invoice, remittance, and credit-memo processing with validation and transformation logic.
- Integrated Oracle ORDS/REST APIs and automated enterprise data/document workflows using Lambda, S3, SQS, Step Functions, DynamoDB, and Redshift.
- Implemented schema mapping, incremental processing, error handling, monitoring, and production troubleshooting with CloudWatch.
- Used Git-based development, testing, modular Python design, and deployment-oriented cloud workflows across client deliverables.

Tech Stack: Python | PySpark | Pandas | REST APIs | AWS Glue | Lambda | S3 | SQS | Step Functions | DynamoDB | Redshift | CloudWatch | Git

Software Developer | 33 Kuber India Advisory LLP

Sep 2023 - Jan 2025

Python Backend, SQL & Business Applications

Developed Python backend services and full-stack business applications with REST APIs, MySQL, React, authentication, reporting, workflow modules, and integrated business systems.

Key Contributions:

- Built and maintained Python REST APIs using Flask/FastAPI patterns and MySQL for business applications and workflow modules.
- Developed authentication, OTP login, password reset, CRM/CRS/SRC integrations, task, attendance, timesheet, leave, and reporting workflows.
- Optimized SQL/MySQL using stored procedures, views, functions, indexes, and query improvements to strengthen application reliability.
- Built React/Tailwind interfaces, integrated backend APIs, used Git/Pytest, and supported debugging, testing, and production issue resolution.

Tech Stack: Python | Flask | FastAPI | MySQL | SQL | REST APIs | React.js | Tailwind CSS | Git | Pytest

PROJECTS

PRINTSOFT REPLACEMENT - Serverless Enterprise Workflow Automation

Client: AUS Logistics | **Period:** May 2025 - Present | **Role:** Data Engineer

Migrated a legacy document workflow to a Python and AWS serverless architecture for automated finance-document processing, API integration, and storage.

- Built Lambda/SQS/S3 workflows for invoices, bills, statements, and credit memos.
- Integrated Oracle ORDS REST APIs and DynamoDB enrichment for automated enterprise processing.
- Implemented conditional PDF/CSV templates, naming conventions, reprint logic, monitoring, and output storage.
- Reduced manual document-processing effort by 80% through workflow automation and audit-friendly storage.

Tech Stack: Python | AWS Lambda | SQS | S3 | DynamoDB | Oracle ORDS | REST APIs | PDF/CSV Automation

PROD FINANCE DATA PIPELINE - Python & AWS Data Processing

Client: MOTOR | **Period:** Feb 2025 - May 2025 | **Role:** Data Engineer

Designed and deployed a Python/AWS data pipeline with distributed ETL, orchestration, SQL/data validation, monitoring, and production failure handling.

- Developed AWS Glue/PySpark processing for approximately 30GB+ of daily finance data.
- Implemented schema mapping, incremental loads, bookmarks, transformation, and data-quality checks.
- Orchestrated processing with Step Functions and Lambda, using S3 as the data-lake layer.
- Added CloudWatch monitoring, SES alerts, Teams notifications, and error handling; reduced downtime by 40%.

Tech Stack: Python | PySpark | SQL | AWS Glue | S3 | Lambda | Step Functions | DynamoDB | Redshift | CloudWatch

JAZZTRACK MANAGEMENT SYSTEM - Python Business Application Platform

Company: 33 Kuber India Advisory LLP | **Period:** Sep 2023 - Jan 2025 | **Role:** Software Developer

Built a database-backed business application with Python APIs, React, authentication, SQL optimization, and integrations across internal operational systems.

- Developed Flask REST APIs and React/Tailwind modules for business workflows and reporting.
- Integrated CRM, CRS, and SRC systems to support centralized customer and operational data flows.
- Optimized MySQL with stored procedures, views, functions, indexing, and query tuning.
- Built OTP authentication, task tracking, attendance, project, timesheet, and leave-management workflows.

Tech Stack: Python | Flask | FastAPI | MySQL | REST APIs | React.js | SQL | Git

AI / AUTOMATION & ENTERPRISE APPLICATIONS

Applied GenAI Focus: Practical experience using **LLM APIs, prompt engineering/automation, AI-assisted workflows, Python automation, data preparation, and RAG concepts** in workflow-oriented applications. Transferable fit for GenAI-enabled backend work includes prompt-driven API integration, structured Python workflows, REST services, SQL/data processing, AWS deployment patterns, validation, logging, and failure handling.

EDUCATION

B.Sc. Information Technology — University of Mumbai | Sree Narayana Guru College of Commerce | Graduated 2023 | 9.13 CGPA
Class XII — R.R.M.Y Inter College High School+2 | Board of Intermediate Education | 2020 | 73.2%
Class X — S.R.P.N. High School | Board of Secondary Education | 2018 | 63%

TARGET ROLES

Target Roles: Python Developer | Backend Engineer | Python API Developer | AI Automation Engineer | GenAI Application Engineer | Cloud Backend Engineer
