MD IRSAD

Python Developer | Backend Engineer | AWS & Automation Developer

+91-8409718735 | mdirsadtech7305@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Python Developer and Backend Engineer with 3+ years of experience building REST APIs, backend services, cloud automation, ETL workflows, finance-data applications, and full-stack business systems. Hands-on experience with **Python, FastAPI, Flask, REST APIs, SQL, MySQL, SQLAlchemy, Pydantic, Pandas, AWS Lambda, S3, Glue, Step Functions, CloudWatch, Docker, Git, Pytest, React, JavaScript, and API integrations**. Experienced in backend development, authentication and workflow modules, database optimization, serverless automation, production troubleshooting, API testing, data processing, and integrating frontend applications with Python services. Strong fit for Python/backend roles requiring practical API development, automation, cloud exposure, SQL databases, debugging, and cross-functional delivery.

Core Expertise: Python | FastAPI | Flask | REST APIs | OOP | SQL | MySQL | SQLAlchemy | Backend Development | API Integration | AWS | Automation | Debugging | Git | Pytest | React

TECHNICAL SKILLS

Programming & Backend: Python 3.12/3.13 | FastAPI | Flask | REST APIs | OOP | SQLAlchemy | Pydantic | Boto3 | API Integration | Backend Services

Databases & Data: MySQL | SQL | Redshift | DynamoDB | Pandas | NumPy | Data Validation | Schema Mapping | Query Optimization | Stored Procedures | Views | Functions

AWS & Cloud: Lambda | S3 | Glue | Step Functions | CloudWatch | SQS/SNS | IAM | API Gateway | ECR | ECS | Cognito | Redshift | Athena

Testing & DevOps: Git | GitHub | Docker | CI/CD | Pytest | Unittest | Testcontainers | SonarQube | Postman | Poetry | Conda

Frontend & Tools: React.js | Next.js | JavaScript/ES6+ | Tailwind CSS | Axios | Jupyter Notebook | DBeaver | VS Code | PyCharm

Automation & AI: Python Automation | Workflow Automation | LLM APIs | Prompt Automation | RAG Concepts | AI-assisted Workflows | Data Preparation

PROFESSIONAL EXPERIENCE

Data Engineer / Python Developer | Freelance – Client: HCLTech / MOTOR

Feb 2025 – Present

Python, APIs & AWS Automation

Build Python and AWS-based data and automation workflows involving REST integrations, distributed processing, serverless orchestration, document automation, monitoring, and production issue handling.

Key Contributions:

- Developed Python and PySpark processing workflows for invoice, remittance, and credit-memo data, including schema mapping, validation, transformation, and incremental processing.
- Built serverless automation using Lambda, S3, SQS, Step Functions, DynamoDB, Redshift, and CloudWatch with retry/error-handling and operational monitoring.
- Integrated Oracle ORDS/REST APIs and automated finance-document workflows, data enrichment, output generation, and storage.
- Troubleshot pipeline/API failures using logs and validation checks, then corrected configuration, data, integration, or processing issues to restore workflows.

Tech Stack: Python | FastAPI/REST Concepts | PySpark | Pandas | AWS Lambda | S3 | SQS | Step Functions | DynamoDB | Redshift | CloudWatch | Oracle ORDS | Git

Software Developer | 33 Kuber India Advisory LLP

Sep 2023 – Jan 2025

Python Backend and Full Stack Business Applications

Developed Python backend services and business applications using Flask/FastAPI, REST APIs, MySQL, React, authentication workflows, reporting, and integrated operational modules.

Key Contributions:

- Built and maintained Python REST APIs using Flask/FastAPI patterns and MySQL for business workflows, reporting, and frontend integrations.
- Developed authentication, OTP login, password reset, task, attendance, timesheet, project, and leave-management workflows with reusable backend logic.
- Optimized MySQL operations using stored procedures, views, functions, indexing, and SQL query improvements; supported API and database troubleshooting.
- Built React/Tailwind interfaces, integrated backend APIs, tested application flows, used Git for source control, and supported production issue resolution.

Tech Stack: Python | Flask | FastAPI | MySQL | SQL | REST APIs | React.js | JavaScript | Tailwind CSS | Git | Pytest | Postman

PROJECTS

ALGOAGENTX – Python/FastAPI Trading Automation Platform

Type: Independent Project | **Role:** Python / Backend Developer

Built a Python/FastAPI platform for strategy backtesting, broker connectivity, trading alerts, risk controls, reporting, and web-based operational workflows.

- Developed FastAPI backend services for backtests, funded-account simulations, strategy management, reporting, and live-trading workflows.
- Used PostgreSQL for application/trading data and Redis for queues, worker coordination, locks, and asynchronous background processing.
- Integrated an MT5 agent with backend APIs and real-time heartbeat/status flows, plus Telegram and WhatsApp alerting workflows.
- Added Docker-based development/production services, logging, API validation, error handling, and operational troubleshooting for long-running jobs.
- Connected the Python backend to a Next.js frontend for dashboards, history/report views, configuration, and administrative workflows.

Tech Stack: Python | FastAPI | PostgreSQL | Redis | Docker | REST APIs | WebSocket | Next.js | MT5 Integration | Git

JAZZTRACK MANAGEMENT SYSTEM – Python Backend & Business Platform

Company: 33 Kuber India Advisory LLP | **Period:** Sep 2023 – Jan 2025 | **Role:** Software Developer

Built a full-stack business platform with Python APIs, MySQL, React, authentication, reporting, and integrated operational workflows.

- Developed Flask/REST APIs and backend modules for customer, task, attendance, project, timesheet, leave, and reporting workflows.
- Integrated CRM, CRS, and SRC systems to centralize customer and operational data across application modules.
- Implemented authentication flows including OTP login and password reset, with backend validation and database integration.
- Optimized MySQL using stored procedures, views, functions, indexing, and query-level improvements while supporting debugging and issue resolution.
- Integrated React/Tailwind frontend modules with Python APIs and supported testing, maintenance, and production fixes.

Tech Stack: Python | Flask | FastAPI | REST APIs | MySQL | SQL | React.js | JavaScript | Tailwind CSS | Git | Pytest

PRINTSOFT REPLACEMENT – Python Serverless Automation

Client: AUS Logistics | **Period:** May 2025 – Present | **Role:** Data Engineer / Python Developer

Migrated a legacy finance-document workflow to Python-based serverless AWS automation for document processing, integration, and storage.

- Built Python Lambda/SQS/S3 workflows for invoices, bills, statements, and credit memos.
- Integrated Oracle ORDS REST APIs and DynamoDB enrichment into the automated processing flow.
- Implemented conditional PDF/CSV templates, naming conventions, reprint logic, validation, and output storage.
- Added workflow error handling and CloudWatch-based monitoring for operational troubleshooting.

Tech Stack: Python | AWS Lambda | SQS | S3 | DynamoDB | Oracle ORDS | REST APIs | CloudWatch | PDF/CSV Automation

PROD FINANCE DATA PIPELINE – Python, PySpark & AWS

Client: MOTOR | **Period:** Feb 2025 – May 2025 | **Role:** Data Engineer

Designed an AWS data-processing pipeline using Python/PySpark, serverless orchestration, SQL/data stores, monitoring, and automated failure handling.

- Developed AWS Glue/PySpark ETL processing for approximately 30GB+ of daily data.
- Implemented schema mapping, incremental loads, bookmarks, transformation, and data-quality checks.
- Orchestrated processing with Step Functions and Lambda using S3 as the data-lake layer.
- Added CloudWatch monitoring, SES alerts, Teams notifications, and error-handling workflows.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | Step Functions | DynamoDB | Redshift | CloudWatch

EDUCATION

B.Sc. Information Technology — University of Mumbai | Sree Narayana Guru College of Commerce | Graduated 2023 | 9.13 CGPA
Class XII — R.R.M.Y Inter College High School+2 | Board of Intermediate Education | 2020 | 73.2%
Class X — S.R.P.N. High School | Board of Secondary Education | 2018 | 63%

TARGET ROLES

Target Roles: Python Developer | Backend Engineer | FastAPI / Flask Developer | AWS Python Developer | Python Automation Engineer | Full-Stack Python Developer
