Professional Summary

Data Engineer and Python Developer with 2+ years of experience in designing scalable ETL pipelines, backend APIs, and automation workflows. Proficient in AWS (Glue, Lambda, Step Functions, S3, Redshift), SQL/MySQL, and Python (Pandas, PySpark, FastAPI). Demonstrated success in automating finance workflows, migrating legacy systems to cloud-native solutions, and optimizing database performance. Experienced in both freelancing and full-time roles, delivering measurable business impact through reduced manual effort and enhanced data processing efficiency. Holds a strong foundation in data preprocessing, algorithm implementation, and practical application of data science tools, with a proven ability to teach and mentor in technical environments.

Professional Experience

Company1 : Freelance (Contract for Client: HCLTech – MOTOR)
Designation : Data Engineer
Period : Feb-2025 to Present

Company2 : 33 Kuber India Advisory LLP
Designation : Software Developer
Period : Sep-2023 to Jan-2025

Technical Skills

Domain	Technical Skill
Cloud & Data Engineering	AWS (S3, Lambda, Glue, Athena, Step Functions, DynamoDB, Redshift, CloudWatch, SNS/SQS, IAM, API Gateway, ECR, ECS, Cognito)
Programming & Frameworks	Python (3.9/3.12), FastAPI, Flask, Pandas, NumPy, PySpark, SQLAlchemy, Boto3, REST APIs
Data & Databases	MySQL, SQL, AWS Athena, DynamoDB, Redshift
Automation & Tools	Selenium, Poetry, Anaconda, Jupyter Notebook, Docker, Git/GitHub, CI/CD
Testing & Quality	Pytest, Unittest, Testcontainers, SonarQube, Logging/Monitoring
Frontend (Secondary skills)	React.js, Next.js, Node.js, Express.js, Tailwind CSS, JavaScript (ES6+), Axios
IDE & OS	PyCharm, VS Code, IntelliJ IDEA | Windows, Linux

Educational Qualifications

- B.SC.IT (Information Technology) from Sree Narayana Guru College Of Commerce, University Of Mumbai.(Graduated: 2023)
- XIIthStandard from R.R.M.Y Inter College High School+2, Board of Intermediate Education. (2018–2020)
- XthStandard from S.R.P.N. High School, Board of Secondary Education. (2017 – 2018)

PROJECT #1 – PRINTSOFT REPLACEMENT

CLIENT NAME- AUS LOGISTICS (FREELANCE)

PROJECT PERIOD - MAY 2025- TILL DATE

DESIGNATION –DATA ENGINEER

Migrated a legacy Printsoft document system to a serverless AWS architecture (Lambda, SQS, S3) integrated with Oracle ORDS APIs. Automated generation of invoices, bills, statements, and credit memos in PDF/CSV formats with conditional templates, reducing manual workload by 80% and ensuring audit-ready outputs.

ROLES AND RESPONSIBILITIES

- Applied Python loops and conditions for data processing.
- Exeption handling in Python using try-except-finally blocks.
- Secure RDS access using IAM roles, VPC, and encryption.
- Monitor slow queries and optimize indexes using RDS logs.
- Deploy models with TensorFlow Serving and TensorFlow Lite using TensorFlow.
- Reduced manual effort by **80%** and improved compliance with audit-friendly document storage.

PROJECT #2 – PROD FINANCE DATA PIPELINE

CLIENT NAME- MOTOR (FREELANCE)

PROJECT PERIOD - FEB 2025- MAY 2025

DESIGNATION –DATA ENGINEER

Designed and deployed a finance data pipeline on AWS using Glue (PySpark), Step Functions, Lambda, and S3 to automate invoice, remittance, and credit memo processing. The system handled 30GB+ daily data, applied schema mapping, and integrated with DynamoDB/Redshift for enrichment, improving data reliability and reducing manual finance effort.

ROLES AND RESPONSIBILITIES

- Integrate with pandas DataFrames for quick plotting using seaborn.
- Handle database schema changes with migrations using Django ORM.
- Perform CRUD operations with Django models using Django ORM.
- Use key IdPs like Azure AD or Okta for SSO setup.
- Improve key security and login experience via SSO.
- Implemented schema mapping, incremental loads, and bookmarks to optimize large-scale data ingestion.
- Built monitoring (CloudWatch, SES alerts, Teams notifications) and error handling, reducing downtime by 40%.

PROJECT #3 – JAZZTRACK MANAGEMENT SYSTEM

COMPANY NAME – 33 KUBER INDIA ADVISORY LPP.

PROJECT PERIOD - SEP 2023 – JAN 2025

DESIGNATION –SOFTWARE DEVELOPER

Designed and delivered robust full-stack web applications using React, Tailwind CSS, and MySQL, with seamless integration of CRM/CRS/SRC systems, efficient RESTful APIs, advanced database tuning using stored procedures and views, and automated testing frameworks that significantly enhanced software stability and reduced bugs.

ROLES AND RESPONSIBILITIES

- Remove outliers and errors in data using Python cleaning.
- Use Pandas for handling missing data during cleaning.
- Prepare model input with smart transformation logic.
- Aggregate values for insights during transformation step.
- Automate feature creation in AI pipelines efficiently.
- Integrated OTP login, password reset, and user authentication features.
- Designed task module for assigning tasks and tracking team progress.
- Developed system to manage attendance, projects, timesheets, and leaves.
