MD IRSAD

AWS Data Engineer | Python Developer | Cloud Data Pipelines

+91-8409718735 | mdirsadtech7305@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Engineer and Python Developer with 3+ years of experience in AWS data engineering, ETL workflows, cloud automation, backend APIs, and finance-data integration. Hands-on with Python, SQL, AWS Glue, PySpark, S3, Lambda, Step Functions, SQS, DynamoDB, Redshift, CloudWatch, Pandas, and REST APIs. Built incremental ingestion and schema-mapping workflows and helped replace legacy finance-document processes with AWS serverless services. Skilled in troubleshooting, data validation, API integration, and production-oriented workflow reliability.

Core Expertise: AWS Data Engineering | Python | SQL | ETL/ELT | PySpark | AWS Glue | S3 | Lambda | Step Functions | Data Validation | Data Integration | Serverless Architecture

TECHNICAL SKILLS

Programming & Backend: Python 3.12/3.13 | SQL | FastAPI | Flask | REST APIs | Boto3 | SQLAlchemy | Pydantic

Data Engineering: AWS Glue | PySpark | Pandas | NumPy | ETL/ELT | Schema Mapping | Incremental Loading | Job Bookmarks | Data Validation | Data Transformation

AWS & Cloud: Amazon S3 | AWS Lambda | AWS Step Functions | SQS/SNS | DynamoDB | Redshift | Athena | CloudWatch | IAM | API Gateway | SES

Databases & DevOps: MySQL | DynamoDB | Redshift | Git | GitHub | Docker | CI/CD | Pytest | Unittest | Poetry | Conda

Integration & Automation: Oracle ORDS | REST API Integration | PDF/CSV Automation | Monitoring & Alerts | Python Automation | LLM API Concepts

PROFESSIONAL EXPERIENCE

Data Engineer | Freelance – Client: HCLTech / MOTOR

Feb 2025 – Present

Finance Data Engineering & Cloud Automation

Delivered AWS-based data and document workflows for finance-domain client projects, combining distributed ETL, API integration, serverless orchestration, and operational monitoring.

- Developed AWS Glue/PySpark ETL for invoice, remittance, and credit-memo datasets with schema mapping, incremental processing, and validation.
- Orchestrated multi-step data workflows using Step Functions, Lambda, S3, DynamoDB, and Redshift.
- Integrated Oracle ORDS/REST APIs and built AWS Lambda/SQS/S3 finance-document automation for downstream consumption and audit storage.
- Supported production troubleshooting using CloudWatch, error handling, alerting, and data-quality checks.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | Step Functions | SQS | DynamoDB | Redshift | CloudWatch | REST APIs

Software Developer | 33 Kuber India Advisory LLP

Sep 2023 – Jan 2025

Business Applications – Backend, APIs & SQL

Built business platforms supporting operational reporting and workflow automation using Python services, SQL databases, and web applications.

- Developed Python/Flask REST APIs and integrated MySQL-backed business services and workflow modules.
- Implemented authentication, OTP login, task, attendance, timesheet, and leave features with API integration.
- Improved MySQL query and database behavior using indexes, views, functions, and stored procedures.
- Delivered React/Tailwind front ends, integration testing, and bug fixes for production applications.

Tech Stack: Python | Flask | FastAPI | MySQL | SQL | REST APIs | React.js | Git | Pytest

PROJECTS

PROD FINANCE DATA PIPELINE – AWS Data Engineering

Client: MOTOR | **Period:** Feb 2025 – May 2025 | **Role:** Data Engineer

Created an AWS finance-data pipeline to ingest and transform invoice, remittance, and credit-memo records for downstream processing.

- Developed AWS Glue/PySpark ETL for approximately 30GB+ of daily data, including schema mapping and data validation.
- Implemented incremental ingestion, job bookmarks, and transformations across S3-based datasets.
- Coordinated pipeline steps using Step Functions and Lambda with Redshift and DynamoDB integrations.
- Added CloudWatch monitoring, SES/Teams alerts, and error handling; reduced downtime by 40%.

Tech Stack: Python | PySpark | Glue | S3 | Lambda | Step Functions | Redshift | DynamoDB | CloudWatch

PRINTSOFT REPLACEMENT – Serverless Finance Document Automation

Client: AUS Logistics | **Period:** May 2025 – Present | **Role:** Data Engineer

Replaced a legacy finance-document workflow with AWS serverless processing for invoices, bills, statements, and credit memos.

- Built event-driven Lambda, SQS, and S3 workflows for automated document processing.
- Integrated Oracle ORDS/REST APIs and DynamoDB data enrichment for document inputs.
- Implemented conditional PDF/CSV formatting, naming conventions, reprint logic, and audit-friendly output storage.
- Reduced manual document-processing effort by 80% through workflow automation.

Tech Stack: Python | Lambda | SQS | S3 | DynamoDB | Oracle ORDS | REST APIs | PDF/CSV

JAZZTRACK MANAGEMENT SYSTEM – Business Application Platform

Company: 33 Kuber India Advisory LLP | **Period:** Sep 2023 – Jan 2025 | **Role:** Software Developer

Built business workflow modules that integrate Python backend services, SQL-based reporting, and web application interfaces.

- Delivered Flask REST APIs, React/Tailwind UI modules, and MySQL-backed operational reports.
- Integrated CRM/CRS/SRC workflows and implemented authentication, attendance, task, and timesheet functions.

Tech Stack: Python | Flask | MySQL | REST APIs | React | Tailwind CSS | Git

AI / AUTOMATION & DATA APPLICATIONS

Applied Automation: Python workflow automation, LLM API integrations, prompt-driven processes, RAG concepts, and data preparation for ML-oriented applications; no claim of production feature-store or ML model deployment ownership.

EDUCATION

B.Sc. Information Technology — University of Mumbai | Sree Narayana Guru College of Commerce | 2023 | 9.13 CGPA
Class XII — R.R.M.Y Inter College High School+2 | Board of Intermediate Education | 2020 | 73.2%
Class X — S.R.P.N. High School | Board of Secondary Education | 2018 | 63%

TARGET ROLES

Target Roles: AWS Data Engineer | Cloud Data Engineer | Data Engineer | ETL Developer | Data Platform Engineer | Python Developer
