MD IRSAD

Data Engineer | Python Developer | AWS Data Pipelines

+91-8409718735 | mdirsadtech7305@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Engineer and Python Developer with 3+ years of combined software-development and data-engineering experience, including contract AWS finance-data workflows and serverless automation. Skilled in Python, SQL, PySpark, Pandas, AWS Glue, S3, Lambda, Step Functions, DynamoDB, REST APIs, data transformations, validation, and production troubleshooting. Deliver finance-document processing, incremental ETL and reliable backend integrations; comfortable collaborating across data and application teams.

TECHNICAL SKILLS

Data Engineering: ETL/ELT | AWS Glue | PySpark | Pandas | NumPy | Schema Mapping | Incremental Loads | Data Quality | Data Validation | Data Integration
Languages & APIs: Python | SQL | FastAPI | Flask | REST APIs | Oracle ORDS | Boto3 | SQLAlchemy | Pydantic
Cloud & Storage: AWS S3 | Lambda | SQS | Step Functions | DynamoDB | Redshift | Athena | CloudWatch | SNS | IAM | API Gateway
Databases & Delivery: MySQL | Git | GitHub | Docker | CI/CD | Pytest | Unittest | Query Optimization | Monitoring | Error Handling
Additional: React.js | JavaScript | Python Automation | Data Preparation for ML | LLM API Integration | RAG Concepts

PROFESSIONAL EXPERIENCE

Data Engineer | Freelance / Contract — Client: HCLTech / MOTOR

Feb 2025 – Present

Finance Data Engineering & Cloud Automation

Built and supported AWS-based finance data workflows, ETL processes, document automation and API integrations across contract projects.

- Developed AWS Glue/PySpark ETL processes for invoice, remittance and credit-memo datasets, with schema mapping and validation.
- Implemented incremental data processing and workflow orchestration using Step Functions, Lambda, S3, DynamoDB and Redshift.
- Integrated Oracle ORDS/REST APIs for finance-data extraction, enrichment and document-generation automation.
- Supported CloudWatch monitoring, alerts, exception handling and investigation of production data-flow failures.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | Step Functions | SQS | DynamoDB | Redshift | CloudWatch | Oracle ORDS

Software Developer | 33 Kuber India Advisory LLP

Sep 2023 – Jan 2025

Python Backend, SQL & Business Applications

Developed and maintained business applications and data-facing services using Flask, MySQL and React.

- Built Flask REST APIs and MySQL-backed services for customer, reporting and operational workflows.
- Implemented authentication, OTP login, task management, attendance, timesheet and leave-management features.
- Improved SQL performance with database views, functions, stored procedures, indexing and query tuning.
- Integrated business systems and React components; supported testing, debugging and production issue resolution.

Tech Stack: Python | Flask | FastAPI | MySQL | SQL | REST APIs | React.js | Git | Pytest

PROJECTS

PROD FINANCE DATA PIPELINE — AWS ETL & Orchestration

Client: MOTOR | **Period:** Feb 2025 – May 2025 | **Role:** Data Engineer

Built an AWS-based finance pipeline covering invoice, remittance and credit-memo datasets.

- Developed AWS Glue/PySpark ETL for approximately 30GB+ of daily finance data, with transformation and schema mapping.
- Implemented incremental loads, bookmarks and data-quality checks to reduce unnecessary reprocessing.
- Orchestrated ETL with Step Functions and Lambda; stored source and processed datasets in S3 and used Redshift in downstream workflows.
- Used CloudWatch, SES alerts and Teams notifications for failure visibility; project-reported downtime reduction of 40%.

Tech Stack: Python | PySpark | AWS Glue | S3 | Lambda | Step Functions | Redshift | CloudWatch

PRINTSOFT REPLACEMENT — Serverless Finance Document Automation

Client: AUS Logistics | **Period:** May 2025 – Present | **Role:** Data Engineer

Modernized a legacy document-processing workflow using AWS serverless components and Oracle ORDS integration.

- Built event-driven Lambda, SQS and S3 workflows for invoices, bills, statements and credit memos.
- Integrated Oracle ORDS APIs and DynamoDB to retrieve and enrich finance records.
- Implemented PDF/CSV templates, conditional rules, consistent naming conventions, reprints and audit-friendly storage.
- Reduced manual document-processing effort by 80% through automation.

Tech Stack: Python | Lambda | SQS | S3 | DynamoDB | Oracle ORDS | REST APIs | PDF/CSV

JAZZTRACK MANAGEMENT SYSTEM — SQL & Business APIs

Company: 33 Kuber India Advisory LLP | **Period:** Sep 2023 – Jan 2025

- Delivered Flask/REST APIs and MySQL modules for CRM/CRS/SRC integration, customer and operational workflows.
- Supported authentication, reporting, attendance, task tracking and timesheets with React-based interfaces.

Tech Stack: Python | Flask | MySQL | REST APIs | React.js | Git

EDUCATION

B.Sc. Information Technology — University of Mumbai | Sree Narayana Guru College of Commerce | 2023 | 9.13 CGPA
Class XII — R.R.M.Y Inter College High School+2 | Board of Intermediate Education | 2020 | 73.2%
Class X — S.R.P.N. High School | Board of Secondary Education | 2018 | 63%

TARGET ROLES

Target Roles: Data Engineer | AWS Data Engineer | Python Data Engineer | ETL Developer | Backend Data Engineer
