GitHub | LinkedIn | Portfolio

Professional Summary

Full Stack Developer & Data Engineer with 2+ years of experience, specializing in React.js, Python, AWS cloud Technologies such as IAM, S3, EC2, Athena, Glue, AWS Step Functions, and CloudWatch. Proficient in crafting ETL Pipeline using Python, Pandas, PySpark, and SQL to ensure efficient data transfer. Experience in developing machine learning algorithms, classification, regression and random forest etc. Expertise in performance optimization using caching and applying best practices through code reviews using SonarLint/SonarQube, streamlining project setups using Conda and Poetry.

Professional Experience

Company1	: Freelance (Client: HCLTech, MOTOR)
Designation	: Data Engineer
Period Of Employment	: Feb-2025 To Till Date
Company2	: 33 Kuber India Advisory Lpp.
Designation	: Software Developer
Period Of Employment	: Sep-2023 To Jan-2025

Technical Skills

Domain	Technical Skill
Amazon Web Services	IAM, EC2, S3, Glue, Lambda, Step Functions, SNS, SQS, CloudWatch, Athena, Redshift, DynamoDB, API Gateway, EC2, ECS, ECR, AWS Cognito, Python, AWS Toolkit etc.
Python and Tools/Libs	Python 3.8/3.9, FastAPI, Anaconda, Jupyter Notebook, csv, pandas, scikit-learn, pyspark, NumPy, pyarrow, boto3, json, urllib3, hashlib, logging, os, glob, io, sys, unittest, pytest etc.
Database	SQL, MySQL, AWS Athena, DynamoDB
Python Testing Tools	Unittest, Pytest, Docker Testcontainer
React	Next.js, Nest.js, Node.js, Express.js, Tailwind CSS, React.js, React components, Context API, hooks, useState, useEffect, Axios API, JavaScript ES6+ etc.
IDE	PyCharm, VS Code, IntelliJ IDEA
Operating System	Window 11, Linux

Educational Qualifications

- B.SC.IT (Information Technology) from Sree Narayana Guru College Of Commerce, University Of Mumbai.(Graduated: 2023)
- XIIthStandard from R.R.M.Y Inter College High School+2, Board of Intermediate Education. (2018–2020)
- XthStandard from S.R.P.N. High School, Board of Secondary Education. (2017 – 2018)

Project #1 – Subscription Milestone

Client Name- Hcltech (Freelance)

Project Period - May 2025- Till date

Designation –Software Engineer

Developed and maintained an AWS Glue streaming data pipeline using PySpark and Python to process, validate, and enrich consignment milestone events from Kinesis streams. Designed and deployed a real-time AWS Glue

streaming pipeline handling 1M+ milestone events per day, enriching Kinesis data with DynamoDB and RDS lookups, and automating 100% of operational metrics reporting to AWS CloudWatch.

ROLES AND RESPONSIBILITIES

- Built and optimized AWS Glue streaming jobs using PySpark, reducing event processing time by 35% and improving data enrichment accuracy across 100K+ daily records.
- Integrated data ingestion from Kinesis streams and RDS using Spark JDBC connectors.
- Implemented business logic for event validation, enrichment and transformation.
- Automated enrichment of event data by querying DynamoDB and other AWS services.
- Streamlined python project setup using Conda and Poetry.

PROJECT #2 – INSIGHTS CONTENT

CLIENT NAME- MOTOR (FREELANCE)

PROJECT PERIOD - FEB 2025- TILL DATE

DESIGNATION –DATA ENGINEER

This project involves the aggregation and analysis of automotive data, specifically focusing on MOTOR repair data collected from various suppliers and manufacturers. The goal is to generate valuable insights into repair trends, component reliability, and supplier performance, which can be used to improve product quality and optimize repair processes.

ROLES AND RESPONSIBILITIES

- Clean, pre-process, and transform large datasets to create high-quality training data for machine learning models.
- Skilled in Python and popular machine learning libraries NumPy, Pandas and Scikit-learn.
- Development of glue pyspark scripts.
- Experience working with very large datasets.
- Expertise and Efficient code writing in Python.
- Secured and protected endpoints using AWS Cognito.
- Streamlined python project setup using Conda and Poetry.

PROJECT #3 – JAZZTRACK MANAGEMENT SYSTEM

COMPANY NAME – 33 KUBER INDIA ADVISORY LPP.

PROJECT PERIOD - SEP 2023 – JAN 2025

DESIGNATION –SOFTWARE DEVELOPER

Designed and delivered robust full-stack web applications using React, Tailwind CSS, and MySQL, with seamless integration of CRM/CRS/SRC systems, efficient RESTful APIs, advanced database tuning using stored procedures and views, and automated testing frameworks that significantly enhanced software stability and reduced bugs.

ROLES AND RESPONSIBILITIES

- Built and optimized full-stack applications using React, Tailwind CSS, and MySQL.
- Developed and deployed RESTful APIs, improving system performance.
- Integrated CRM, CRS, and SRC systems, enhancing customer data analytics.
- Implemented RESTful APIs using python Flask, Mysql.
- Database Optimization: Led efforts in optimizing MySQL databases, implementing stored procedures, views, and functions to support scalable and efficient data processing.
- Integrated OTP login, password reset, and user authentication features.
- Designed task module for assigning tasks and tracking team progress.
- Developed system to manage attendance, projects, timesheets, and leaves.
